

The **"FM Wizard"** Radio Station Pre-Wired Kit allows you to be on the air with automation while recording and editing audio for broadcast. Two rack mount computers allow for production capability to be built right in. The Automation allows you to sound live with time checks and local weather reports while giving you up to six days of walk-a-way time. The Two Bay antenna creates 1.99 times gain from the 1000 watt output of the transmitter yielding **1950 watts** ERP or Effective Radiated Power.

Here is what is included...all pre-wired and tested by our engineers

- | | |
|----------------------------------|--|
| (1) Two Bay Dipole Antenna* | (1) 150' 1/2" Coaxial Cable |
